Our mission is to create and cultivate a lifestyle free of alcohol, marijuana, and other drugs among youth and families through empowerment, family strengthening, skill building, and education.

The programs & services we offer are designed to:

- Reduce underage alcohol & marijuana use.
- Build relationships.
- Build family communication skills.
- Strengthen communities.

Contact us if you want to...

- Become more informed and aware about underage alcohol and marijuana use.
- Become a certified model program facilitator.
- Begin a conversation in your community about alcohol and marijuana.

- Earn FREE continuing education hours (CEHs).
- Ability to incorporate curriculum into existing programs or use as a stand-alone program.
- Extremely effective outcomes, even with volunteer or intern facilitators.
- Training includes detailed outreach, engagement, and retention tips.
- Free facilitation training.

# SPEAKER SERIES

*The Speaker Series Workshops* are free events for teens, parents, and professionals that feature multi-media presentations, prevention tools, the latest research, and immediately usable tips. The workshops include a Q & A session and an optional panel of experts who help them.

## Video Presentations

- **The Other Side of Cannabis:** An award winning documentary on the unique effect of marijuana use on youth.
- **Chronic State:** Video and PowerPoint presentation on marijuana legalization and its impact on communities.

## Speaker Series

*Highly engaging, informative and interactive PowerPoint presentations.*

- **Today's Marijuana:** It's unique effect on teens.
- **Teens & Alcohol:** Too much, too soon, too often.
- **Parenting to Keep Your Teen Drug-Free:** Keep your teen drug-free with practical tips.

# INTERACTIVE DRUG AWARENESS EXHIBITS

## Fatal Vision: Marijuana Simulation

In this exhibit, we deliver a memorable experience about the potentially dangerous consequences of impairment from marijuana use. Lessons and activities demonstrate: loss of visual perception, short-term memory loss, altered visual perception, change in reaction time and decision-making.

## Hidden in Plain Sight: Real Life Mock-Up

This display provides parents with clues found in teens' bedrooms to help determine whether their child might be experimenting with drugs or alcohol and hiding the evidence in plain sight.
