

INNS

Concepts discussed not apparent in plan which we thought were important

① Importance of helping client to be assisted in feeling an important part of a community (contributing) (e.g. thru job, volunteer work, activism, to provide a alumni group to mentor) a community on the outside so they don't have to return to jail to have a "family."

② Helping probationers deal with pressure to continue to be involved in gangs

③ Helping probationers deal constructively with negative affect (e.g. anger, feeling abandoned) suggest DBT (dialectical Behavioral therapy) training, started in jail + continued out of jail

INN 5

One person on team "owns" the client. The person that the probationer calls, the person who "beats the bushes" to get the probationer the service they needed.

(so don't risk each team member deciding the request is somebody else's job)

Attachment G - Written Public Comment

With more than \$26 million going out annually going to the community @ large →

While it's good to have the ↑ to \$900K for the Af Am Trauma RFP - it does not seem adequate - for this pop. that is so negatively impacted & the 2nd largest min. grp in the County.

I encourage the County to explore the work of the CRTD as a potential model for structuring the Af Am Trauma/Wellness RFP →

(e.g. *Provision of Capacity Bldg for smaller orgs in Phase II)
